

REST - Country Web Service

Project Structure

CountryController.java:

```
package orm_learn.controller;
import org.springframework.web.bind.annotation.RequestMapping;
import org.springframework.web.bind.annotation.RestController;
import orm_learn.model.Country;
@RestController
public class CountryController {
    @RequestMapping("/country")
    public Country getCountryIndia() {
        Country country = new Country();
        country.setCode("IN");
        country.setName("India");
        return country;
    }
}
```

Country.java:

```
package orm_learn.model;

public class Country {
    private String code;
    private String name;
    public Country() {
    }
    public Country(String code, String name) {
        this.code = code;
        this.name = name;
    }
    public String getCode() {
        return code;
    }
    public void setCode(String code) {
        this.code = code;
    }
    public String getName() {
        return name;
    }
    public void setName(String name) {
        this.name = name;
    }
}
```

OrmLearnApplication.java:

```
package orm_learn;

import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;
@SpringBootApplication
public class OrmLearnApplication {

    public static void main(String[] args) {
        SpringApplication.run(OrmLearnApplication.class, args);
    }

}
```

application.properties:

```
server.port=8083
```

Output:

```
PS C:\Users\Lenovo\OneDrive\Desktop\orm-learn\orm-learn> mvn spring-boot:run
