

REACTJS (ASSIGNMENT 10)

Aim

To create a React application named officespacerentalapp using JSX to display office space details, render React elements to the DOM, display office information using objects and arrays, and apply inline CSS to change the rent color based on its value.

1. Create a new React application named officespacerentalapp.

```
npx create-react-app officespacerentalapp
```

2. Navigate to the project folder.

```
cd officespacerentalapp
```

3. App.js

```
import './App.css';
```

```
function App() {
```

```
  const officeList = [
    {
      name: "DBS",
      rent: 50000,
      address: "Chennai",
      image: "https://images.unsplash.com/photo-1497366754035-f200968a6e72?w=500"
    },
    {
      name: "Regus",
      rent: 70000,
      address: "Bangalore",
      image: "https://images.unsplash.com/photo-1497366811353-6870744d04b2?w=500"
    },
  ],
```

```
{
  name: "WeWork",
  rent: 90000,
  address: "Hyderabad",
  image: "https://images.unsplash.com/photo-1497366412874-3415097a27e7?w=500"
}
];
```

```
return (
  <div className="App">

    <h1>Office Space Rental App</h1>

    {
      officeList.map((office, index) => (

        <div key={index}>

          <img
            src={office.image}
            alt={office.name}
            width="300"
            height="200"
          />

          <h2>{office.name}</h2>
```

```

    <h3
      style={{
        color: office.rent < 60000 ? "red" : "green"
      }}
    >
      Rent : ₹{office.rent}
    </h3>

    <h3>
      Address : {office.address}
    </h3>

    <hr />

  </div>

  ))
}

</div>

);
}

```

```
export default App;
```

4. Result

The React application was developed successfully. Office space details were displayed using JSX, office objects and arrays were rendered using the map() function, and inline CSS was applied to display the rent in red when it was below ₹60,000 and green when it was above ₹60,000.

5. Output

```
PS C:\Users\eshit\OneDrive\Desktop\officespacereentalapp> npm start
```

You can now view **officespacereentalapp** in the browser.

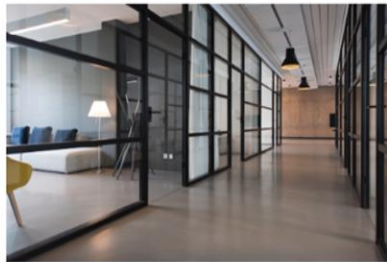

Local: <http://localhost:3000>

On Your Network: <http://192.168.56.1:3000>

Note that the development build is not optimized.
To create a production build, use `npm run build`.

webpack compiled **successfully**

Office Space Rental App

DBS

Rent : ₹50000

Address : Chennai

Regus

Rent : ₹70000

Address : Bangalore

WeWork

Rent : ₹90000

Address : Hyderabad
