

REACTJS (ASSIGNMENT 2)

Aim:

Create a react app for Student Management Portal named StudentApp and create a component named Home which will display the Message “Welcome to the Home page of Student Management Portal”. Create another component named About and display the Message “Welcome to the About page of the Student Management Portal”. Create a third component named Contact and display the Message “Welcome to the Contact page of the Student Management Portal”. Call all the three components.

1. Create the React Project

`npx create-react-app StudentApp`

```
Success! Created student_app at C:\Users\eshit\OneDrive\Desktop\myfirstreact\student_app
Inside that directory, you can run several commands:
```

```
npm start
  Starts the development server.

npm run build
  Bundles the app into static files for production.

npm test
  Starts the test runner.

npm run eject
  Removes this tool and copies build dependencies, configuration files
  and scripts into the app directory. If you do this, you can't go back!
```

We suggest that you begin by typing:

```
cd student_app
npm start
```

2. Go to the Project Folder

`cd StudentApp`

3. Run the Project

`npm start`

4. Home.js

```
function Home() {

  return (

    <h1>Welcome to the Home page of Student Management Portal</h1>

  );

}
```

```
export default Home;
```

5. About.js

```
function About() {  
  return (  
    <h1>Welcome to the About page of the Student Management Portal</h1>  
  );  
}
```

```
export default About;
```

6. Contact. Js

```
function Contact() {  
  return (  
    <h1>Welcome to the Contact page of the Student Management Portal</h1>  
  );  
}
```

```
export default Contact;
```

7. App.js

```
import Home from "./Components/Home";  
import About from "./Components/About";  
import Contact from "./Components/Contact";
```

```
function App() {  
  return (  
    <div>  
      <Home />  
      <About />
```

```
        <Contact />
    </div>
);
}
```

```
export default App;
```

8. Output
