

REACTJS (ASSIGNMENT 1)

Assignment 1:

Creating a React Application

Aim

To install React, create a new React application using **Create React App**, and display the heading "**Welcome to the first session of React**" in the browser.

1. Create the Project

`npx create-react-app myfirstreact`

```
PS C:\Users\eshit\OneDrive\Desktop> npx create-react-app myfirstreact

Run `npm audit` for details.

Created git commit.

Success! Created myfirstreact at C:\Users\eshit\OneDrive\Desktop\myfirstreact
Inside that directory, you can run several commands:

  npm start
    Starts the development server.

  npm run build
    Bundles the app into static files for production.

  npm test
    Starts the test runner.

  npm run eject
    Removes this tool and copies build dependencies, configuration files
    and scripts into the app directory. If you do this, you can't go back!

We suggest that you begin by typing:

  cd myfirstreact
  npm start

Happy hacking!
```

2. Go to the Project Folder

`cd myfirstreact`

3. Open the Project

`code .`

4. src/App.js

```
function App() {  
  return (  

```

```
<h1>Welcome to the first session of React</h1>

);

}
```

export default App;

5. Run the Application

npm start

6. Output

```
PS C:\Users\eshit\OneDrive\Desktop\myfirstreact> npm start

> myfirstreact@0.1.0 start
> react-scripts start

(node:23820) [DEP_WEBPACK_DEV_SERVER_ON_AFTER_SETUP_MIDDLEWARE] DeprecationWarning: 'onAfterSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.
(node:23820) (Use 'node --trace-deprecation ...' to show where the warning was created)
(node:23820) [DEP_WEBPACK_DEV_SERVER_ON_BEFORE_SETUP_MIDDLEWARE] DeprecationWarning: 'onBeforeSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.
Starting the development server...
Compiled successfully!

You can now view myfirstreact in the browser.

  Local:            http://localhost:3000
  On Your Network:  http://192.168.56.1:3000

Note that the development build is not optimized.
To create a production build, use npm run build.

webpack compiled successfully
```
